Ticker: **VFLEX**

As of Date: June 30, 2020

Fund Overview

The Relative Value Fund (VFLEX) offers investors access to a diversified portfolio of less-liquid alternative investments with access to unique illiquidity premiums and income characteristics. The interval fund structure of VFLEX provides investors: daily pricing; 1099 tax reporting; and quarterly liquidity subject to limitations. As portfolio managers, the interval fund structure provides the flexibility to invest across alternative asset classes that more closely mirror the full range of investment options presented in the qualified purchaser (QP)-only investment universe – including Private Equity, Real Estate, Alternative Credit and Hedged Strategies. Liquid alternative strategies will also be utilized in separately-managed accounts to manage portfolio liquidity and a nimble portfolio positioning. VFLEX provides these assets classes in a streamlined, cost-efficient vehicle to clients of all sizes, without net worth requirements or restrictive investment minimums.

Implementation Hurdles & VFLEX Efficiencies

Implementation	⊗ Hurdles (without VFLEX)	⊞ Efficiencies (with VFLEX)
Paperwork	Tender offer funds, non-traded REITS and LPs require investor paperwork to enter – making implementation difficult to scale.	There will be no paperwork required. Investors can access a fully diversified portfolio on a daily basis through ticker ‘point, click, and buy’.
Tender Offer Complexities	Every tender offer, interval fund and LP has different mechanisms for meeting quarterly redemptions. Knowing how to track and model these nuances while also working with custodians who lack the technology to aggregate tender requests has created a labor-intensive process for Advisors.	Investors will gain a dynamic exposure through VFLEX, as Vivaldi will manage the internal tender process with each underlying fund; therefore, eliminating the complexities of managing multiple tender offers. Clients of VFLEX will have quarterly liquidity subject to fund tender limits.
Transaction Costs	Platform transaction costs have made it costly to implement a diversified approach, particularly with smaller client accounts.	Transaction costs will be reduced to simply one ticket charge for VFLEX.
Net Worth & Investment Minimums	Tender offer funds, non-traded REITS and LPs have high net worth requirements & minimums.	VFLEX has no net worth requirements & zero investment minimums.
Platform Approvals	The best strategies can have substantial timelines to receive platform approvals across broker-dealers and custodians.	VFLEX is already approved at all the platforms and can purchase new interval and tender offer funds directly.

¹ This is only a model portfolio for The Relative Value Fund (“VFLEX”). The model portfolio is a forecast portfolio that represents Vivaldi’s view on what the account’s portfolio may look like under normal market conditions. The portfolio is actively managed and will seek to achieve its investment objective by utilizing a flexible asset allocation strategy across a wide array of asset classes and sectors. Vivaldi may choose to focus on countries or regions, asset classes, industries and sectors to the exclusion of others at any time or from time to time based on market conditions and other factors. Model portfolio allocations should not be relied upon as an indicator of future results or used as the basis for investment decisions.

² The Fund has implemented a level distribution policy resulting in monthly distributions of \$0.09896 per share of common stock, representing an ann. distribution rate of 5.0% as of 6.30.2020. Distributions may be paid from sources of income other than ordinary income, such as net realized short-term capital gains, net realized long-term capital gains and return of capital. The actual amounts and sources of the amounts for tax reporting purposes will depend upon the Fund’s investment experience during the remainder of its fiscal year and may be subject to changes based on tax regulations. If a distribution includes anything other than net investment income, the Fund provides a Section 19(a) notice of the estimate of its distribution sources at that time. These estimates may not match the final tax characterization (for the full year’s distributions) contained in shareholders’ 1099-DIV forms at year-end.
